

1990-05 MITSUBISHI HEADUNIT / AMP REPLACEMENT CONVERTER

The HRC-MIT or (MITAH) converts the Mitsubishi radio or amplifier 6-pin DIN to RCA level (4 channels & amp trigger). Use this interface to replace the OEM (factory) headunit with an aftermarket headunit or to replace the OEM amplifier and speakers with aftermarket equipment.

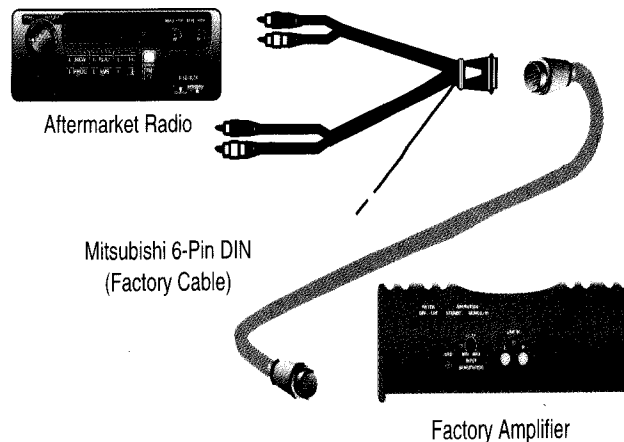

See diagram below. (please note that a low voltage trigger (1VT) may be required when replacing factory amplifiers.

Connections:

Short RCA's - Front Channel } (Red-Right Black-Left)
 Long RCA's - Rear Channel }
 Blue Wire - Amp Trigger

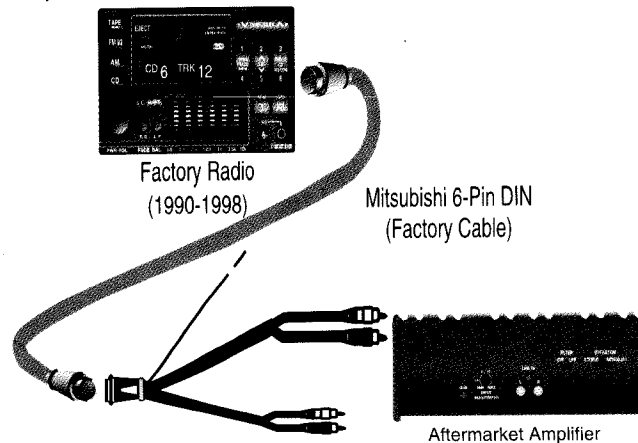

Replace Factory Radio:

The HRC-MIT plugs into the 6-pin amplifier DIN cable and allows the installation of any aftermarket radio (with pre-amp output) while still maintaining use of the factory Infinity amplifier and speakers.

Replace Factory Amplifier and Speakers:

The HRC-MIT installs at the factory amplifier location and allows the factory Infinity Radio to be used with aftermarket amplifiers and speakers.

(Low-volt trigger may have to be used when replacing amplifier)
