READ ALL INSTRUCTIONS CAREFULLY BEFORE INSTALLING, FAILURE TO DO SO MAY CAUSE PERSONAL INJURY OR DAMAGE TO PRODUCT AND/OR PROPERTY

- This installation guide is provided as a GENERAL installation guide, some vehicles vary and may require additional steps. We do not accept responsibility for third party labor charges or modifications. Exercise due-diligence when installing this product.
- We do not accept any responsibility for vehicle damage or personal injury resulting from the installation of this product.
- Careless installation and operation can result in equipment damage.

Requirement

Radios with CD button and 8-pin socket

Introduction:

They are literally thousands of older Hondas and Acura's on the road that still has the original radio in place that unfortunately lack support for Bluetooth, but thanks to the BT2-HDN these radios can be upgraded to support Bluetooth music streaming. Installation could not be simpler and only requires connecting the BT3-HDN module to the 8-pin CD changer socket, pairing Bluetooth device and be on your way to streaming navigation, audio books and other important applications on the car system! **Because this module uses the "CD" port, factory single CD or CD changer (if present) must be disconnected.**

Warning!! All compatible radios must have a "CD" button on face and 8-pin socket at the rear. Radios with 8-pin socket at the rear without a "CD" button on faceplate (e.g., models: 1100, 1901, 2100, 2100, 2300 etc.) are NOT compatible.

Installation:

1. Remove radio to gain access to the connector.
Alert: Vehicle specific radio removal instructions are not included but may be available upon request. Please email us [here](#)
2. Locate radio 8-pin connector and disconnect any accessory that may already be connected (See **Fig. 2**)
3. Connect the Bluetooth module 8-pin plug (See **Fig. 1**) to 8-pin socket on radio or slave cassette player (See. **Fig. 2**)

Fig. 1

Fig. 2
8 pin socket

4. Tuck and secure any extra wires away from moving parts

Pairing:

Pairing process varies between devices but basic steps are the same. Pairing is done upon initial install and will not have to be repeated.

1. Turn ignition and radio "ON"
2. From your Bluetooth enabled device, turn the Bluetooth ON and search for Bluetooth devices.
3. When a list of available Bluetooth devices appears on your Bluetooth device, select "DisCarSt" (See Fig. 3)
4. Confirmation "tone" is heard on car speakers.
5. The unit will automatically enter the BT Audio source and you can now start streaming audio from your Bluetooth enabled device.

Note: If the mobile phone doesn't support SSP (Simple Secure Pairing) Profile, please enter the pass code of "0000"

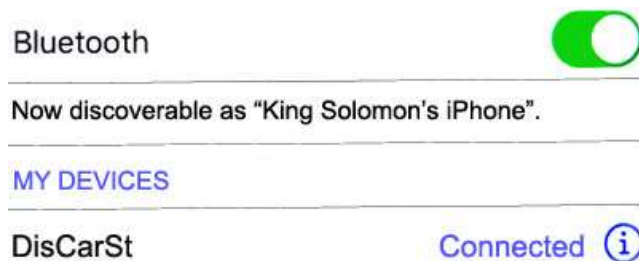

Fig. 3

Bluetooth operation

1. Turn ignition to "ACC" and turn on the radio
2. Press the radio "CD" button to enter "CD/Bluetooth" mode. (See Fig. 4)
Radio changes from AM/FM display to default CD changer display mode: Disc X Track X or as seen in Fig. 4

Fig. 4

Warning: Playlist, artist name, song name etc. *NOT* possible on the Honda radio.

3. Open streaming application (e.g., Spotify, Deezer, Apple music etc.)
4. The application should now be heard on car speakers otherwise check volume on audio device and/or radio
Alert: For best results; set audio device volume to 85% or higher.
5. To track up; press the radio **SEEK >|** button
6. To track back; press the radio **|<< SEEK** button (See Fig. 5)

Fig. 5

Notes:

1. If playback is distorted or low, adjust volume on mobile device.
2. Bluetooth range is approximately 15 ft. Ensure device is within range
3. AM/FM button is not used to enable the BT2-HDN

Frequently ask questions & troubleshooting

1. **Does the BT2-HON work on all Honda radios?**

NO; The BT2-HON works on select 1992-01 Honda CD changer controlling radios. CD changer controlling radio will have a "CD" or "CD/TAPE" button on face AND **8-pin socket at the rear**. Honda radios missing the "CD" or "CD/TAPE" button are not compatible even with 8-pin socket at the rear. Must have both!!

2. **My radio has a built-in 6 CD changer, will the BT2-HON work?**

Most (if not all) Honda **6-CD changer** radios (**changer built-into radio**) do **NOT support** an external device (lacks 8-pin port seen in **Fig. 2**) and therefore not compatible. Many Acura 6-CD changer radios DO SUPPORT external devices. Please check for 8-pin DIN socket (See **Fig. 2**) prior to purchase.

3. **Can I use the Honda radio buttons to control streaming?**

YES. the radio or steering wheel "SEEK" buttons can be used to track up/down from within a playlist.

4. **Will I be able to make phone calls using this module?**

NO; the BT2-HON does not support hands-free calls. See our [BT3-HON](#) instead.

5. **What happens if a call comes in while streaming?**

Streaming will mute, Answer call from handset as you would in portable mode. Streaming resumes upon ending call.

6. **My radio has an AM/FM instead of "CD" button. Will the BT2-HON work?**

NO; Radio must have a "CD" button and 8-pin DIN connector. For example: Acura Legend radio (2100) is able to access the remote CD changer using the AM//FM button, however the BT3-HON requires a "CD" button to function as described.
