G2-HF

Visor mount microphone kit Installation Guide

Created August 13, 2018

Revised: November 16, 2019

Optional Visor mount microphone Kit

If you installed or plan to install one of our "HF" (Hands-Free) kits, be aware the microphone is built into the control button (See **Fig. 1**) which means it must be mounted or installed in an area where it can be accessible to the driver which may work in some vehicle but may not be optimum for issuing voice commands or holding Bluetooth conversations in others.

Fig. 1

Due to the many customer request, we assembled the G2-HF kit which allows for more installation flexibility by allowing control button to remain on the dash or within drivers reach and separate clip-on type microphone which would ideally mount to visor (See **Fig. 2**) from which driver can issue voice commands, hold Bluetooth conversations while also keeping eyes on the road.

Package contents:

Microphone with visor clip on 10ft. cable x 1
Control button (green) x 1
Splitter harness x 1

Fig. 2

Installation:

1. Use clip to Install microphone to visor or location of choice and route cable down pillar, under dashboard toward Bluetooth module location
2. Connect microphone right angle 2-pin plug (See **Fig. 3**) to "Mic input" jack on splitter harness (See **Fig. 3**) – larger jack with lip indicated by arrow.

Fig. 3

3. Connect control button to "Control button" jack on splitter harness as seen in **Fig. 3** (smaller jack)
4. Connect splitter harness male plug to module "Mic" input (blue) as seen in **Fig. 4**

Fig. 4

Warning: If clicking sound or no audio during playback, microphone and control buttons connections to splitter may be reversed.

Please also note, it is possible to connect both the original control button (blue phone symbol) or included control button (green phone symbol) to splitter harness.
