

1989-UP MITSUBISHI /DODGE RADIO/AMP REPLACEMENT KIT

The HRC-MIT and CZA-MIT converts Infinity 6-pin DIN socket on Mitsubishi radio/amplifier into an RCA level (4-channel & amp trigger). Purchase one of these interfaces to replace the factory OE head unit with an aftermarket OR to replace the factory OE amplifier and speakers.

Use diagrams below to make the proper connections based on application.

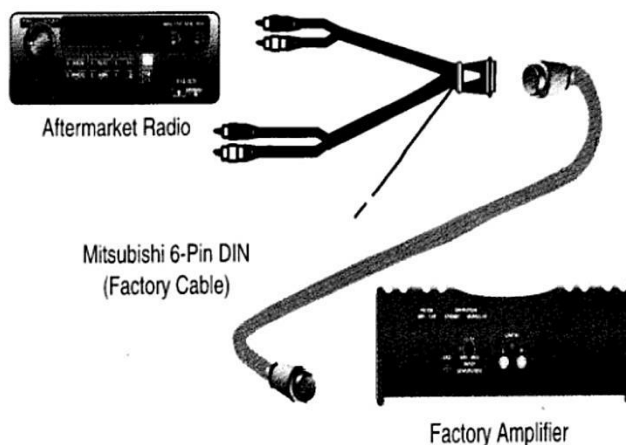

Noteworthy: A Low [voltage trigger](#) may be required when replacing the Infinity amplifier.

Connections:

Short RCA's - Front Channel } (Red-Right Black-Left)
 Long RCA's - Rear Channel }
 Blue Wire - Amp Trigger

Replace Factory Radio:

The HRC-MIT plugs into the 6-pin amplifier DIN cable and allows the installation of any aftermarket radio (with pre-amp output) while still maintaining use of the factory Infinity amplifier and speakers.

Replace Factory Amplifier and Speakers:

The HRC-MIT installs at the factory amplifier location and allows the factory Infinity Radio to be used with aftermarket amplifiers and speakers.
